PREFACE

Treasuries are the principal organs of the Government accounting system, they play an important role in keeping watch over receipt of Government revenue and control over expenditure. The Government has devised codes, manuals and procedures for proper functioning of the Treasuries. The review on the working of Treasuries is prepared and published by my office, annually, to highlight the internal control of weakness, in the functioning of the Treasuries, which is responsible for deviations from rules and procedures, and result in lax financial management.

Based on the working of Treasuries, this Annual Review has three parts.

- (1) Part-I Organizational setup of Treasuries
- (2) Part-II Deficiencies noticed in Internal controls and other lapses during compilation and verification of accounts.
- (3) Part-III Observations and irregularities noticed during the inspection of Treasuries.

The objective behind the publication of this report is strengthening the controls so that any departure from rules and procedures can be trapped immediately to prevent any fraud, scam or financial loss.

I hope this report will, to that extent, help in improving Treasury administration. Suggestions to increase the utility of the review are welcome.
